

# What Do Supply Chain Leaders Look for In a Logistics Partner?

In a recent survey commissioned by GlobalTranz, supply chain leaders shared the most important capabilities they look for in a prospective supply chain and logistics partner. Among the 12 most important qualities, data visibility, customized solutions, and ease of use of technology platforms were cited as the top attributes.

**Provides real-time data available to everyone across the company**

**Has customized services to meet your company's specific needs**

**Offers easy to use technology platforms**

**Provides you with do-it-yourself technology tools**

**Has a vast transportation network that can handle any regional, national, or global needs**

**Available 24/7 for any support or requests**

**Considered an industry leader**

**Uses predictive analytics to improve operational efficiency**

**Has one seamless offering that handles all of my company's supply chain/logistics needs**

**Has technology tools that are accessible through both a desktop and mobile device**

**Provides managed transportation services (i.e. outsourced transportation services)**

**Offers multimodal transportation services (e.g. truckload, less than truckload, rail, air, ocean)**
